The Language of Instrumental Music (TLIM) is a class for beginner adult musicians who have some knowledge of instrumental music, but may have been confined to traditional classical lessons, school band, or orchestra; or beginner adult musicians who have no prior experience with music-making or instrument-playing.

TLIM is designed to help musicians fuse the fun of performance, music theory, composition, and improvisation into a consolidated expressive package.

Class topics will include the basic principles of pitch, rhythm, instrumental construction, sound production, reading notation, improvisation, and composition.

We utilize the format of instrument-specific small group classes (keyboards with keyboards, violins with violins, etc.), and mixed instrument ensembles.
